

Pierrot® Amaryllis

Growing Amaryllis brings massive, vibrant trumpet-shaped flowers into your home during the cold winter months when most other plants are dormant. We are proud to sell larger bulbs, than box stores, that produce more stems and flowers.

Hippeastrum 'Pierrot' size 38/40cm

- **Use:** Pierrot stands as one of the most festive amaryllis on the market, and makes a wonderful living gift to give a special friend or coworker. Each bulb will produce at least 2 stems and a total of 8+ flowers.
- **Exposure/Soil:** Prefers full sun to part sun. Indoors high light to prevent stretch. Water regularly, when top 3 in. of soil is dry, but allow soil to dry slightly in between watering. We don't recommend forcing them in straight water. Drought tolerant when established and need good drainage. Wet soil in winter is a death sentence. Plant outdoors in late April(after last frost) in sandy soil and they will come back each year in zone 8.
- **Growth:** Sturdy stems grow about 18-22" tall. The bulb will send out more stalks of flowers and grower larger over time. *Ask cashier for a handout on care.*
- **Hardiness:** Zone 7-10 Perennial Herbaceous.
- **Foliage:** Deciduous. Long, strap-like leaves.
- **Flower:** Bicolor, vivid cherry-red petals contrasted with sharp, clean white stripes and a lime-green center. Large trumpet-shaped blossoms measuring roughly 6-9" across. Typically opens 8 to 10 weeks after planting indoors, usually around midwinter or the holiday season.
