

Splash Premium Amaryllis

**Comes
back
every
year and
very
easy to
grow!**

Hippeastrum 'Splash'

- **Use:** This is truly a premium Amaryllis with a generous double layer of petals. The Amaryllis you see offered at the chain stores bear absolutely no resemblance to the lusty giants we secure through special contracts with a Dutch grower. Our bulbs produce two flower stems, each with at least four blooms, and are easily grown on from year to year. Dutch Amaryllis will bloom about 8–10 weeks from arrival.
- **Exposure/Soil:** Prefers full sun to part sun. Water regularly, when top 3 in. of soil is dry, but allow soil to dry slightly in between watering. We don't recommend forcing them in straight water. Drought tolerant when established. Plant outdoors in late April in sandy soil and they will come back each year in zone 8.
- **Growth:** Stems grow 1-2 feet tall. The bulb will send out more stalks of flowers and grower larger over time. Too much water or low light can cause stems to elongate.
- **Hardiness:** Zone 7-10 Perennial
- **Foliage:** Deciduous. Long, strap-like leaves.
- **Flower:** A brilliant red double, each petal blazed with white. The 5" blooms also hold their heads up well. After flowers have faded keep watering bulb lightly until last spring frost and then plant in your garden.
