

Silvester Hyacinth

- Planting density: 4-6 inch apart, 5 per sq. ft.
- Planting depth: 6-8 inches to base of the bulb.
- Best planted in a mass of 20 or more for dramatic effect.

Hyacinth orientalis 'Silvester'

- **Use:** Nothing is more fragrant in the spring border. These large bulbs are the finest. Excellent for creating a naturalized hedge. Deer resistant. Grow them in or outdoors for their graceful shape, long-lasting blooms and sweet scent. Hyacinths are great for indoor forcing, containers, and borders.
- **Exposure/Soil:** Full– part sun. Water regularly, when top 3 in. of soil is dry. Drought tolerant once established. Prefers a light sandy well drained soil. Place a layer of mulch over the bulbs in summer to keep them cool and remove again in the fall as they like cold winters.
- **Growth:** Grows 8-12” tall.
- **Hardiness:** Zone 4 –8 Bulb
- **Foliage:** Deciduous. Strap-like leaves.
- **Flower:** A deep pink flower, making it almost iridescent, but it's the fragrance that really draws you in.
