

# Navel Orange Tree

Produce plenty of juicy, seedless oranges, effortlessly. Simply enjoy them wherever you get full sun. Another beneficial aspect of Navel Oranges is that they have a long shelf life - longer than most other oranges. So, there's no rush to eat, bake or cook them before they go bad. You can store them for months!

## *Citrus sinensis* 'Washington'

- **Use:** Healthful and delicious, the Navel Orange is one of the most popular varieties at the grocery store. But you won't believe how much better they are when you grow them yourself: Extremely sweet, these oranges will quickly become an addictive snack. And you'll love them because they're simple to peel and they're seedless.
- **Exposure/Soil:** Full sun. These citrus trees require moist, but not wet, soil, and should be watered deeply, but not frequently. The soil pH should be neutral. With regular fertilizing, you can have your first harvest this year. Citrus are heavy feeders and need citrus fertilizer often.
- **Growth:** Moderate growing 8 ft. tall, 8-12 ft. wide in containers. (In South Florida outdoors could grow 10-15' tall)
- **Hardiness:** Zone 8-11; Must be grown indoors in winter for reliable fruit production.
- **Foliage:** Evergreen, glossy green, fragrant foliage if brought indoors in winter.
- **Flower:** Fragrant 1" white flowers, We love the fragrance of the blossoms!
- **Fruit:** Produce fruit with a reliable quality, sweet flavor, seedlessness, and easy-to-peel experience. Their fresh flavor is perfect for cooking with, as well as adding to drinks to give your favorite recipes some extra brightness.
