

Kadota Fig

Made Fig Newton's famous
Yellow-green skin with red juicy flesh
Excellent for eating fresh and cooking
Drying, jams, & jellies too

Ficus carica 'Kadota'

- **Use:** An attractive deciduous garden tree with intriguing branching that provides excellent winter character. A reliable fall harvest of especially sweet, greenish yellow fruit. A beautiful specimen for garden or landscape with light annual pruning. ***Please be sure to read the Home Garden Figs article from UGA on our Plant Information Page on the website.***
- **Exposure/Soil:** Grow in full sun. Well-drained, rich soil. pH of 5.5 to 6.5 necessary.
- **Growth:** Moderate growing; reaches 15 to 25 ft. tall and wide. Can be kept smaller, but do not prune too vigorously. Plant 15' apart.
- **Hardiness:** Zone 7-10; Tree. Highly adaptable and often root hardy and prolific in zones 5 and 6 if planted in a sheltered location.
- **Foliage:** Deciduous. Large foliage overs shade.
- **Flower/ Fruit:** An open bush, ripening most of its figs on last years growth. The fruits are yellow, medium to large size and delicious, ripening best with full sun and hot temperatures. Also known as Peter's Honey fig. Kadota is a popular fig because as a canned product it can be purchased in super markets in the US. Kadota is excellent fresh and very sweet. It sometimes ripens a few early figs that are extremely large.
