

Crimson Star Red Goji Berry Bush

These bright red berries help our immune system ward off disease. They are juicy and sweet when eaten fresh, and when dried, are similar to cranberries or dates. Can be enjoyed as a healthy snack, or made into juice, wine and tea. Glossy foliage and a graceful arching habit. Produces white to purple blooms in early summer.

Lycium barbarum 'Crimson Star Red'

- **Use:** Goji berries are often referred to as the Superfruit and are known for their high levels of vitamins and minerals. Goji berries can easily be grown in your garden or as a shrub in the landscape. They will thrive in alkaline soils and require little care.
- **Exposure/Soil:** Prefers full to part sun.
- **Growth:** : Grows 6-8' tall and wide. Staking may help.
- **Hardiness:** Zone 5-9; Shrub
- **Foliage:** Deciduous; Foliage is very feathery, open and airy. Plants are fast growing with slender silver-blue leaves.
- **Fruit** Small purple star flowers appear along the new stems in summer, followed by large oblong red berries, which are very nutritious. The plant continues to flower and produce fruit until the first good frost. The berries can be eaten fresh; they can also be cooked or dried. Self-fertile.
