

Dynamite Goji Berry Bush

These bright orange-red berries help our immune system ward off disease. They are juicy and sweet when eaten fresh, and when dried, are similar to cranberries or dates. Can be enjoyed as a healthy snack, or made into juice, wine and tea .

Glossy foliage and a graceful arching habit. Produces white to purple blooms in early summer.

Lycium barbarum 'Dynamite'

- **Use:** Goji berries are often referred to as the Superfruit and are known for their high levels of vitamins and minerals. Goji berries can easily be grown in your garden or as a shrub in the landscape. the weight of the berries cause the branches to arch over into a weeping configuration that makes the berries very easy to harvest.
- **Exposure/Soil:** Prefers full to part sun. They will thrive in alkaline soils and require little care.
- **Growth:** : Grows 5-7' tall and wide.
- **Hardiness:** Zone 5-10; Shrub
- **Foliage:** Deciduous; Foliage is delicate and pale green-blue.
- **Fruit** Self pollinating and produces intensely sweeter berries when left to mature until the berries are completely ripe on the bush. The brilliant red berries look much like small peppers and can be eaten fresh when they ripen starting in June, or the berries can be dried for eating later.
