

Chocolate Sprinkles Tomato

Crack-resistant fruit have an attractive striped pattern. Delivers the first in this type with a disease-resistance package. Unique fruit color: red with dark green overlay/striping for a "chocolaty" appearance that will appeal to foodies. Very productive, with lots of cherry tomatoes that have true tomato flavor and a nice, firm bite.

Lycopersicum 'Chocolate Sprinkles'

- **Use:** As tempting as its well-deserved name, Chocolate Sprinkles is the perfect balance of flavor, appearance, yield, and disease resistance. These bite-sized tomatoes have striking, forest green streaks over deep coppery-red and a delightfully sweet taste. Indeterminate plants produce abundant, thick trusses of the scrumptious, crack-resistant fruit. HR: F, N, TMV.
- **Exposure/Soil:** Full sun or at least 5-6 hours of afternoon sun. Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer for best results. Keep water off leaves and flowers.
- **Growth:** Grows quickly 3' tall. Plant 3' apart in rows(4' wide). You'll definitely want to stake or cage these vigorous climbers to keep the fruit off the ground and avoid pests and diseases.
- **Hardiness:** ZOne9-11, Annual, Houseplant.
- **Foliage:** Small, lacy leaves.
- **Fruit:** A hybrid cherry tomato about one inch in size. Its glossy red skin is overlaid with dark green stripes, giving it a unique chocolate-like coloring. The fruits are firm, and they offer a full-bodied, sweet tomato flavor with a high brix level (a measurement of sugar content).
