

Rabbiteye Blueberry Bush

Vaccinium ashei

- **Use:** Grow your own fresh blueberries! Fun for children and a great source of antioxidants!
- **Exposure/Soil:** Prefers light, acid soils (pH 4.5-5.2) with high organic matter (20-50%) are preferred, unlike most fruit crops.
- **Growth:** Moderate, 4-10' tall and wide; best if pruned.
- **Hardiness:** 6-9; shrub
- **Pollination:** Cross pollinator needed; choose 2 different plants from chart at right; deciduous.
- **Flower:** Berries are blue-black color; good fruit quality. Fruit mature in about 90 days from bloom. More info on our website on the PLANT INFORMATION PAGE.
