

# Triumph Muscadine

**Great for fresh eating!**

## *Vitis rotundifolia* 'Triumph'

- **Use:** One of the better bronze self-fertile cultivars in UGA testing. Berry size is medium large, but not as large as 'Tara'. Berry color has a definite pinkish hue, and harvest date is early. Fruit is very sweet, and was well liked by testers at UGA. 60% dry scar.
- **Exposure/Soil:** Grow in full sun. Muscadine grapes grow well on a wide range of soils but best results are obtained from well-drained sandy loams with a pH of 5.5 to 6.5. They will not tolerate low, wet ground.
- **Growth:** Plant in full sun at 15-20 ft. apart on strong trellises.
- **Hardiness: Zone** 7-10; Vine
- **Foliage:** Deciduous. Dark green above and green tinged yellow beneath, the leaves are glossy on both sides, becoming firm and sub-glabrous at maturity.
- **Flower:** Yields are consistently high, but prompt picking recommended. Recommended as a bronze self-fertile cultivar in fresh fruit vineyards. Print out more information from our Plant Info page on our website.
