

String Assortment

Senecio(Curio) / Ceropegia sp.

These little beauties are particularly well-suited to hanging baskets where the dense trailing foliage can cascade over the sides.

- **Use:** Enjoy these little beauties in baskets, on windowsills, or anywhere you want to add a touch of fun and whimsy.
- **Exposure/Soil:** High indirect light indoors. To prevent rot, use well-draining pots and soil and only water when the soil is dry. Keep the soil even drier during winter dormancy. To grow a lush, baskets regularly prune the stems and re-plant the cuttings back in the same pot. Make sure that all parts of the trailing mass get sunlight and, if possible, move the plant outdoors to a covered porch or patio each summer.
- **Growth:** Grows 12" tall and trails down. Spreads more over time, but not invasive.
- **Hardiness:** Zone 9-12; Houseplant/ Annual
- **Foliage:** Evergreen if kept indoors. ***Not edible-keep away from pets.***
- **Flower:** Varies on species.
