

# Compact Perfection Dieffenbachia

## ***Dieffenbachia 'Perfection Compacta'***

- **Use:** This specific species is more compact-growing than the others and features soft, cream colored leaves and bright green mottling. A tried-and-true houseplant enjoyed by generations of plant owners, this tropical aroid features bold, variegated leaves and an easy-growing nature.
- **Exposure/Soil:** Tolerates low light but grows best in a medium to bright spot. Avoid full direct sun as leaves may burn. This plant needs to live in a room with at least some natural light. Place it on a table or countertop with windows nearby. This plant can only go 1-2 weeks without water so check on it weekly and add water every time the top two inches of soil dry out. Do not let plant stand in water in saucer either. Prefers slow release fertilizer!
- **Growth:** Grows in an upright growth habit, reaching up to 3' tall and 18" wide.
- **Hardiness:** Zone 10-11; Houseplant; Annual; Bring inside in winter.
- **Foliage:** Medium-green leaves speckled heavily with creamy yellow in the centers. *Not for human or pet consumption.*
- **Flower:** Not known for flowers.

This plant filters pollutants from the air while releasing oxygen. With this plant in your home, you breathe cleaner air.
