

Red Cloud Vein Plant

This plant filters pollutants from the air while releasing oxygen. With this plant in your home, you breathe cleaner air.

This plant is considered non-toxic, therefore safe around children and pets.

This unusual houseplant is a real conversation piece or annual to put in your shade planters.

Fittonia 'Red Cloud'

- **Use:** This easy grower adds a brilliant red color to a windowsill garden or terrarium. Especially grown for its foliage in low light areas, the low, mounding growth habit makes it highly desirable for limited spaces.
- **Exposure/Soil:** It thrives in bright, indirect light, high humidity (above 50%), and consistently moist soil at temperatures of 60–80°F. It is known to droop when it needs water. Reduce watering in winter. Use soft, tepid water. Misting is necessary. Can be enjoyed outdoors when nite temps are above 60 degrees in shady areas.
- **Growth:** Can grow 1-2' tall.
- **Hardiness:** Zone 10 Houseplant, Annual
- **Foliage:** Deep green leaves with intense red to pinkish-red, vein-like patterns. Lower light will result in less red and more green in the foliage.
- **Flower:** Not known for flowers.
