

Cupid's Peperomia

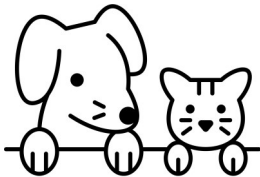

Peperomia scandens 'Variegata'

- **Use:** If you want a plant that will be a beautiful addition to your home and one that you can grow easily without any hassles, then you must try the Peperomia Cupid. This plant is the perfect example of a low-maintenance plant that tolerates cool, low humidity environments.
- **Exposure/Soil:** Morning sun to light shade outdoors; bright indirect light indoors. Water when top inch of soil is dry to the touch and sparingly in winter. Moist, well-drained soil. No fertilizer is needed the first few months after planting, then feed at monthly intervals with a water-soluble house plant fertilizer. Day and night temperatures of 60-75°F are fine year round. Mist leaves regularly to maintain humidity and pinch to keep the plant bushy.
- **Growth:** Grows 8-12" tall and wide.
- **Hardiness:** Zone 11-12, Annual, Houseplant;
- **Foliage:** It has thick, glossy, heart-shaped green leaves that are edged in white.
- **Flower:** Not known for flowers, but they are small curved rods.

This plant filters pollutants from the air while releasing oxygen. With this plant in your home, you breathe cleaner air.

This plant is considered non-toxic, therefore safe around children and pets.
