

# Philodendron Hope

**Great as a  
specimen on pa-  
tio or a house-  
plant!**

## ***Philodendron 'Hope'***

- **Use:** Great for on a patio or semi shady location outside. Also can be used as a houseplant. Philodendron "Hope" replaced the old Philodendron "Selloum" a few years ago. This new Philo is easy to grow.
- **Exposure/Soil:** In a partially sunny location it's growth habit will resemble the pictured plant in indoors In low light it tends to become some what leggy. Prefers part sun outside. Water regularly, when top 3 in. of soil is dry usually every week. Do NOT ALLOW TO DRY OUT! Do not plant stand in water in saucer either. Use slow release fertilizer.
- **Growth:** Moderate growing 2-3 foot tall and wide.
- **Hardiness:** Houseplant, must bring inside in the winter or when temps go below 45 degrees.
- **Foliage:** Likes to be misted if possible.
- **Flower:** None
