

Golden Clubmoss

We think they look lovely in a shade container planted with Hostas and Heuchereas.

We recycle empty pots and trays!

Selaginella kraussiana 'Aurea'

- **Use:** A low creeping mat with attractive moss-like semi-evergreen foliage of a yellow green color. This pre-historic fern relative creates a stunning contrast around dark greens. One of the most vigorous-growing "Tropical Club Mosses", this golden form adds a touch of brilliance to potted containers or terrarium design. Grow as a miniature in a small pot or hanging basket and will spill down the sides.
- **Exposure/Soil:** Easy to grow in part shade to shade. Use slow release fertilizer for best results. **DO NOT FORGET TO WATER!**
- **Growth:** Forms a 6-inch high and 2' wide.
- **Hardiness:** 8-11, Annual, houseplant; May be hardy with winter protection from wind and frost.
- **Foliage:** The creeping stems create a dense mat, quickly covering the soil's surface.
- **Flower:** No flowers, but spores.
