

Snaggle Tooth Planter

This plant filters pollutants from the air while releasing oxygen. With this plant in your home, you breathe cleaner air.

Some of these plants are considered non-toxic, therefore safe around children and pets.

This unusual houseplant is a real conversation piece or annual to put in your shade planters.

Fittonia (pet safe)- Hypoestes (petsafe)- Soleirolia (pet safe)

- **Use:** These easy to grow plants adds whimsy to a windowsill or table. These quirky pots are great gifts for teacher, grandkids, and friends who love the macabre.
- **Exposure/Soil:** It thrives in bright, indirect light, high humidity (above 50%), and consistently moist soil at temperatures of 60–80°F. It is known to droop when it needs water. Reduce watering in winter. Use soft, tepid water. Misting is necessary. Can be enjoyed outdoors when nite temps are above 60 degrees in shady areas.
- **Growth:** Can grow 1-2' tall.
- **Hardiness:** Zone 10 Houseplant, Annual
- **Foliage:** Asst foliage types
- **Flower:** Not known for flowers.
