

Peace Lily

The most popular blooming, low light plant for indoors.

This plant filters pollutants from the air while releasing oxygen. With this plant in your home, you breathe cleaner air.

Spathiphyllum sp.

- **Use:** This houseplant is super lush, easy to care for, and perfect for the beginner houseplant parent! Its glossy green leaves and white flowers give it a clean, timeless look. An attractive indoor foliage plant which tolerates very low light levels.
- **Exposure/Soil:** The soil should be kept moist but never soggy. Allow the soil to dry out slightly between waterings, but excessive drying can make the plant to wilt and cause yellowing of leaves. When watering, it is very important to use room temperature water which has been allowed to sit for 24 hours to allow the chlorine to evaporate. It is a good idea to bottom water.
- **Growth:** Typically grows 22-24", but can grow 3-4' tall and wide.
- **Hardiness:** Zone 10 Houseplant, Annual
- **Foliage:** Handsome paddle-shaped leaves standing erect from short stems.
- **Flower:** Flower stalks have a white, erect bract behind the inflorescence spike. Can bloom 2-3 times per year, each bloom lasting up to 12 weeks.
