

# PRO-MIX BX with Mycorise

Use to plant trees, shrubs, perennials, annuals, and houseplants. Its blend allows optimum water drainage and air exchange far superior to cheap soils (mostly bark) sold at other stores.

Not available in other soils on the market mycorrhize helps break down food for the plants!

Contains a mycorrhizal inoculum for plant growth enhancement.

*Cheap soils at other stores contain weed seed and filler bark! This is for serious gardeners and really cuts down on your need to water.*

## Contains:

- Sphagnum Peat Moss (75-85%)
- Perlite
- Calcitic and dolomitic limestone
- Wetting Agent
- Mycorrhizae – endomycorrhizal inoculum (*Glomus intraradices*)
