

# 18.5" Mojave Planter

SKU:YMT14000

## Design your own patio planter!

- *Made from durable polypropylene*
- *Now you can create your own planter to put on your patio table or on the steps.*
- *We recommend using Soil Moist when making the container to retain water and keep the soil consistently moist over longer periods of time. Also, on larger pots we put a layer of 25% bark in bottom of pot for drainage and make sure holes stay open.*
- *Also, using our Slow Release fertilizer will give your plants the nutrients they need for over 3 months in one application.*
