

# Getty White Lily of the Nile

**It blooms from late spring through summer and attracts both bees and butterflies.**

## *Agapanthus praecox* 'Getty White'

- **Use:** Has stunning pure white flower heads. These clusters bloom in summer, and are complemented by glossy green strap like foliage. We recommend it for borders, mass plantings, and containers. Attracts Birds and Butterflies, excellent as cut flowers, good disease and pest resistance, drought tolerance, and returns year after year.
- **Exposure/Soil:** Full to part sun. During the summer, be prepared to give them plenty of water. During the winter they prefer well-drained soils.
- **Growth:** Grows 2-3' H x 1-2' W
- **Hardiness:** Zone 7-10 Perennial; Mulch around plant in the winter.
- **Foliage:** Deciduous. Forms green, fountainlike tufts of lush, strappy foliage.
- **Flower:** White flower stalks. Blooms open in spring, reblooming through summer.
