

Dwarf Calidora Upright Elephant Ears

Shorter height than most Upright Elephant Ears on the market. A real crowd pleaser! New to market.

Alocasia 'Calidora Dwarf'

- **Use:** A stunning indoor feature plant or equally as impressive when planted in the garden. Its versatility also allows it to be an impressive indoor plant with large elephant ear-shaped leaves and deep green color.
- **Exposure/Soil:** Ideally, recreate a tropical rainforest - steamy and hot and not too sunny. Water little and often so the compost is moist but not soggy. Mist it regularly if your climate is not naturally humid. Turn the plant every month or so if you are growing it indoors so it stays symmetrical. Keep it warm and sheltered.
- **Growth:** Grows 3-5' tall and wide.
- **Hardiness:** Zone 8-10(some reports of it hardy to zone 6/7), perennial Mulch around the base of the plant 1– 2 ft in the fall.
- **Foliage:** Deciduous; produces big ribbed foliage that looks like it could have fanned Cleopatra once upon a time. Its upright, arrow-shaped leaves sit on larger-than-life petioles, and can grow up to 1-3 feet long and 1-2 feet wide.
- **Flower:** Not known for their flowers.
