

# Fall In Love Swiftly Anemone

**PW**  
PROVEN  
WINNERS®

**This is a great plant for the woodland edge, and all along the middle of any mixed border or sunny foundation planting.**

## **Anemone 'Fall In Love Swiftly'**

- **Use:** It has semi-doubled, rose-pink blooms that appear on top of its foliage. The continuous blooming begins in late summer, and continues to through the fall. Use as border plant, in mass planting, as a focal point, or use its cut flowers in your next bouquet or arrangement.
- **Exposure/Soil:** In warmer zones, they need protection from the hot, mid-day sun; dappled shade is ideal. Use slow release or water soluble fertilizer. Plant them in rich, loose, well-drained soil. Dry or excessively wet soil and windy conditions are a sure downfall of this plant. Always best to water under leaves.
- **Growth:** Moderate growing; reaches 20 to 26 in. tall,(24" in full flower) 24 to 30 in. wide. Spreads slowly through rhizomes.
- **Hardiness:** Zone 4-8; Perennial. Very easy to grow!
- **Foliage:** Deciduous; Tough, green foliage is a great backdrop for the flowers.
- **Flower:** A fall blooming perennial. Semi-double, rose pink flowers are produced above a large mound of dark green foliage. Vigorous with continuous blooms from mid-June until mid-fall. The seed heads look like little fluffy cotton balls, standing atop strong stems to give interest to the garden from fall into winter.
