

# Powis Castle Artemisia

## ***Artemisia 'Powis Castle'***

- **Use:** For a distinctive accent in borders or an unusual ground cover, we recommend this slinky silver foliage. It takes drought and cold, and aromatic oils make the leaves deer resistant. It also makes a fine addition to fresh or dried bouquets. A good companion for Mediterranean plants like Lavenders, Rosemary and Species Tulips.
- **Exposure/Soil:** Prefers full sun to part sun. Keep surface of soil moist, but not soggy. Likes a lot of water for fast growth.
- **Growth:** Fast growth to 2-3' high and keeps spreading in width.
- **Hardiness:** 5-10 perennial.
- **Foliage:** Deciduous; Lovely silver foliage is aromatic.
- **Flower:** Not known for flowers.

**Fast and very easy to grow!**
