

Cinderella Butterfly Weed

**Bring
back
the But-
terflies!
We love
them
for their**

**long lasting blooms and
strength. A must have for
Monarchs to lay their eggs!**

***Asclepias incarnate* 'Cinderella'**

- **Use:** Plants are deer resistant and heat tolerant, too. They have small, curiously shaped blooms that appear in dense clusters. These plants provide nourishment for Monarch butterflies through all their life stages, and are essential for their survival.
- **Exposure/Soil:** They should be grown in well-drained soil in full sun. Use slow release or water soluble fertilizer. Must have good drainage!
- **Growth:** Reaches 3 to 5 ft. tall and 2 to 3 ft. wide
- **Hardiness:** Zone 3-9; Perennial. Very heat tolerant! Mulch around plant in the winter.
- **Foliage:** Deciduous. This species has narrow 6 inch long lance-shaped leaves.
- **Flower:** A genuine star whose unusually dense clusters of pale pink flowers open from dark pink buds. The vanilla-scented flowers last well in water and attract butterflies and hummingbirds.
