

Campfire Glow Chrysanthemum

Chrysanthemum 'Campfire Glow'

- **Use:** One of the most popular fall perennials, mums offer late season color when summer blooms have faded. Campfire Glow adds warmth to the autumn garden with sizzling shades of glowing red and orange, radiating from the yellow center of its bicolored blooms.
- **Exposure/Soil:** Prefers full sun to light shade. Moist well draining soil is best. Heavy feeder when actively growing.
- **Growth:** Typically grows 2-3' tall and 12" wide. It grows vigorously and needs summer pinches to stimulate flowering and encourage branching and a more compact form. To pinch, simply snap off about an inch of the tip of each shoot when it reaches 6 to 8 inches tall and repeat as needed. Stop pinching before the summer equinox in mid June or you could pinch out buds.
- **Hardiness:** Zone 5-9; Perennial.
- **Foliage:** Deciduous. Attractive lobed green leaves.
- **Flower:** Bicolored blooms in sizzling shades of red and orange radiating from yellow centers late summer to fall. Long lasting cut flower

Super easy to grow!
