

Super Star Coreopsis/Tickseed

Coreopsis 'Super Star'

- **Use:** Bright and happy, 'Super Star' Coreopsis will light up your pollinator garden or sunny perennial beds with an exciting twist on an old favorite. Huge lemon-yellow flowers have a ring of deep red brushstrokes, surrounding a fuzzy golden center. Held above grassy green lanceolate foliage, they'll create a low carpet of high-impact bloom from summer through fall. WE love to plant them in front of grasses for a drought resistant and easy perennial border. Deer resistant.
- **Exposure/Soil:** Prefers full-part sun It's fairly drought tolerant and needs little water. Looks lovely outside on the patio in planter. Can divide easily in spring.
- **Growth:** Grows of 12-16" tall and wide.
- **Hardiness:** Zone 5-10; Perennial. Very heat and drought tolerant!
- **Foliage:** Deciduous. The dark green foliage makes a great contrast with the flower color.
- **Flower:** Features beautiful, large yellow and deep crimson flowers from spring - fall Blooms continuously from early spring through late fall. Removing faded flowers regularly will extend the bloom season.

**Super
tough and
drought
tolerant
once es-
tablished.**
