

# Allyson Mexican Heather

## *Cuphea hyssopifolia* 'Allyson'

- **Exposure/Soil:** This unique and very hardy plant can be grown at any light level. It's fairly heat and drought tolerant once established and needs little water. They are ideal as additions to containers, baskets and mass planted in beds.
- **Growth:** Grows to 8-12" tall and 16-18" wide in one season.
- **Hardiness:** Zone 7b-10 tender perennial. Very heat tolerant! Mulch around plant in the winter. May plant in the ground in spring and they will come following year back in a protected area with a good mulch layer before winter.
- **Foliage:** Deciduous. Small leaves.
- **Flower:** Thousands of small purple blossoms cover this plant from mid May until October. Be patient as the plant doesn't emerge next year until late May.
