

# Desert Dancer Series Ice Plant

**'Red' PPAF**

**Purple ('FSDD2117') PP36,476**

## ***Delosperma 'Desert Dancer Series'***

- **Use:** The new Delosperma Desert Dancers are game changers with their unique, intense dark red foliage that enhances the landscape's visual appeal even without flowers! The vibrant red foliage adds drama to the landscape, but once the intensely colored flowers appear, it creates the most striking focal point. Desert Dancers flowers abundantly, and combined with the captivating foliage, it makes for a year-round visual impact in the (rock) garden, mixed containers, perennial borders or green roofs. As if that's not enough, the neat, mound-forming habit makes these Delosperma perfect for hanging baskets.
- **Exposure/Soil:** Plant in full sun to partial sun(5 or more hours). Use slow release or water soluble fertilizer. Allow soil to be slightly dry between waterings. ***Must have well-drained sandy, soil.*** Red clay or packed soils is a death sentence. Drought tolerant once established.
- **Growth:** It grows to 6" high and 32" wide.
- **Hardiness:** Zone 5-10; Perennial. Very heat tolerant! Mulch around plant in the winter.
- **Foliage:** Deciduous. Even when not in bloom, the small, red, needle-like succulent foliage still adds landscape interest.
- **Flower:** Stunning, vivid flowers with a small yellow center. It's a magnet for pollinators and butterflies. You just won't believe the bloom strength of this perennial groundcover powerhouse from late spring into fall!

Deer resistant, perennial, heat tolerant, and drought tolerant.
