

Firespinner Ice Plant

Delosperma Firespinner

- **Use:** Just wait until you experience its quick spread, heavy bloom, and long season of color in your own sunny garden! If you're looking for something bright to cover that poor, dry soil beside the driveway, in the sunny border, or along a slope where the hose can't reach, and is EX-ACTLY what you need! This Hardy Iceplant is a marvel. It will spread up to 2 feet wide within just 2 seasons of growth. Yet this plant forms a dense, colorful mat that chokes out weeds and retains soil moisture beautifully.
- **Exposure/Soil:** Plant in full sun to partial sun(5 or more hours). Use slow release or water soluble fertilizer. Allow soil to be slightly dry between waterings. Must have well-drained soil. Drought tolerant once established.
- **Growth:** Low growing plants grow 2-4" tall and to 2-3' wide or more.
- **Hardiness:** 5-9 perennial. Very heat tolerant! Mulch around plant in the winter.
- **Foliage:** Deciduous. When not in bloom, the small, needle-like succulent foliage of brightest green reaches just 1 to 2 inches high.
- **Flower:** When the gorgeous multi-colored 1½-inch flowers begin appearing, the height increases to just 4 inches in spring thru summer!

Deer resistant, perennial, heat tolerant, and drought tolerant.
