

Violet Wonder Ice Plant

Delosperam cooperi 'Violet Wonder'

- **Use:** It's just made to line the hot driveway, cover a large patch of poor soil, or cascade in all directions from a container. Even a small planting has a big impact, so you can imagine what a large, generous swathe of this perennial will look like in the sunny garden. Hardy, succulent gray-green foliage is ideal for borders, hillsides, rock gardens and other tough sites. Attracts butterflies. And Wheels of Wonder® flowers continuously from spring until frost. Exceptionally drought-tolerant, this sun-loving plant forms a dense mat of succulent foliage. Given good soil drainage, some water the first season to get it going, and plenty of sunshine, there's just no stopping it!
- **Exposure/Soil:** Plant in full sun to partial sun(5 or more hours). Use slow release or water soluble fertilizer. Allow soil to be slightly dry between waterings. Must have well-drained soil. Drought tolerant once established.
- **Growth:** Just 6 to 8 inches high in full bloom, Wheels of Wonder® Hot Pink spreads up to 2 feet wide in no time.
- **Hardiness:** **Zone** 5-9 perennial. Very heat tolerant! Mulch around plant in the winter.
- **Foliage:** Deciduous. Dense mat of succulent foliage
- **Flower:** The flowers on this incredible reblooming hardy Iceplant are TWICE the size of any other. Yep, 4 inches or more across, easily. Richly colored and very abundant, they begin in late spring and continue in waves all spring, summer, and into fall. You just won't believe the bloom strength of this perennial groundcover powerhouse! Held above plump, succulent olive-green foliage, these blooms have violet edges with a glowing yellow center. They crowd atop the plant, facing the sun, so that all you see at the height of bloomtime is the little tips of the leaves underneath!

Deer
resistant,
perennial,
heat
tolerant, and
drought
tolerant.
