

Jewel of Desert Garnet Ice Plant

Delosperma cooperi 'Jewel of Desert Garnet' PP23471

- **Use:** There has never been a hardy iceplant like the Jewel of Desert series, and Garnet is among its most beautiful members! This breeding breakthrough delivers bright blooms on groundhugging plants continuously from spring until frost. Hardy, succulent gray-green foliage is ideal for borders, hillsides, rock gardens and other tough sites. Attracts butterflies.
- **Exposure/Soil:** Plant in full sun to partial sun(5 or more hours). Use slow release or water soluble fertilizer. Allow soil to be slightly dry between waterings. Must have well-drained soil. Drought tolerant once established.
- **Growth:** Low growing plants grow 2-4" tall and to 2-3' wide or more.
- **Hardiness:** Zone 5-9 perennial. Very heat tolerant! Mulch around plant in the winter.
- **Foliage:** Deciduous. Dense mat of succulent foliage
- **Flower:** Not a rebloomer -- an everbloomer, and it's so easy to grow! The 2-inch flowers are daisy-shaped and so bright, with petals that shade from deep red to pink surrounding white and yellow centers. Ideal for large plantings, accents, and containers, they are long-lasting and neon-bright in the sun-soaked garden.

Deer resistant, perennial, heat tolerant, and drought tolerant.
