

Summer Cloud Larkspur

Delphinium grandiflorum 'Summer Cloud'

- **Use:** A sweet edger! Creamy buds open to abundant gentian blue flowers with white centers clustered on the open branching habit; blooming earlier and with better heat tolerance than many taller hybrid Delphinium. Blooms first year.
- **Exposure/Soil:** Plant in part sun in our area, full sun up North. Use slow release or water soluble fertilizer. Keep soil moist watering under leaves and flowers. If you are not good at watering we recommend using **Soil Moist**.
- **Growth:** Grows 10-12" tall and 1' wide. Shorter height means less likely to need staking
- **Hardiness:** Zone 3-8, Perennial Save seeds for following year to resow.
- **Foliage:** Deciduous. Finely cut leaves.
- **Flower:** The smallest delphinium we have seen, only a foot tall, but still covered with big, dramatic blooms. Deep blue flowers with white centers. Attracts hummingbirds.

Stately and breathtaking. Magnificent dense racemes make larkspur excellent in the border and as a cut flower.
