

Carmen Red Dianthus

Long blooming, perfect for small bouquets-most are fragrant. A cottage garden is not complete without several Dianthus. All are heat tolerant and low maintenance beauties.

Dianthus caryophyllus 'Carmen Red'

- **Use:** This true carnation overwinters better than any other carnation on the market. Carmen features excellent uniformity and blooms continuously until first frost.
- **Exposure/Soil:** Plant in full sun to part sun. Moderate water requirements, but somewhat drought tolerant. Must amend the soil if you have poor soil (like red clay). We recommend the Pro Mix Soil.
- **Growth:** Compact, clump forming 6 to 8 in. tall, 15 to 18 in. wide.
- **Hardiness:** Zones 5-9; Perennial
- **Foliage:** Evergreen Glaucous foliage with unique dense mounding habit.
- **Flower:** Striking double red blooms are long lasting and fragrant.
