

# Sunflor Vulcano Dianthus

## *Dianthus 'Allura Sunflor Vulcano'*

- **Use:** The Sunflor® pot carnations can be used both indoors and outdoors, will flower from spring until late autumn, and are completely hardy. Plants form a neat compact mound of grassy foliage smothered with fully double flowers. Added bonus of a wonderful spicy-clove fragrance. Excellent for containers, rock gardens and borders. Drought tolerant and easy to grow. Good drainage is essential for winter hardiness. Bred in The Netherlands.
- **Exposure/Soil:** Needs a sunny site with well-drained soil, but will tolerate some shade in the afternoon along with humidity. Regular watering during prolonged dry spells will be necessary. However, they are tolerant of short periods of dryness. Little water needed once established.
- **Growth:** The habit is compact and mounding to a height of about 4-6" tall and 6-8" wide.
- **Hardiness:** Zone 4-9, Perennial
- **Foliage:** Evergreen. Glaucous grey-green foliage provides a stark contrast for these shockingly showy flowers.
- **Flower:** Masses of lava red fully double flowers on short stems. Flowers have a good fragrance, making them ideal for using in indoor flower arrangements. Prune off old flowers for longest bloom time.

Very easy  
to grow and  
low maintenance!  
**FRA-GRANT!**
