Crimson Eye

Dianthus 'Venti Parfait Series'

- **Use:** The next generation of Super Parfait™ Dianthus, with mega-sized, showy blooms on compact and well-branched plants. Greater plant vigor easily fills retail-ready containers and provides extended garden color. Bold bicolors add class and vibrancy to the series. A good addition to the front border or used as an edging along a walk way. Will bloom for many years! This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.
- **Exposure/Soil:** Plant in full sun to part sun. Moderate water requirements, but somewhat drought tolerant. Must amend the soil if you have poor soil (like red clay). We recommend the Pro Mix Soil.
- **Growth:** Full sized plants grow to 8-10" tall and 8-10" wide.
- **Hardiness:** Zones 5-9; Perennial/ biennial
- **Foliage:** Evergreen. Small dark green-blue narrow leaves.
- **Flower:** Ruffle like flowers with a nice contrasting scarlet eye. Long bloom time. The flowers are excellent for cutting.

Amazing flowers with contrasting deep crimson centers, covering mounds of fine blue-green foliage; great for flower arrangements; deadhead to promote re-blooming; a stunning display for border fronts and containers
