

Artic Fox Rose Foxglove

Large trumpets call to hummingbirds in spring and summer.

Digitalis hybrida 'Balroxose' PPAF

- **Use:** Imagine a richly colored foxglove, with its trademark nodding, tubular blooms and tall, stately stems, that adds color to your landscape every year. Arctic Fox Rose is a rare perennial hybrid foxglove that produces flowers yearly instead of biennially, like other foxgloves. Giving foundations, back borders and cutting gardens an impressive pop of color and a touch of architectural interest, this newcomer turns any landscape into a designer-inspired display. Thanks to the hooded flower shape, busy pollinators are protected as they gather nutrients from the area. The extended bloom period ensures your property shows to its best advantage for weeks on end. Frost tolerant and deer resistant.
- **Exposure/Soil:** Part sun– part shade, very easy to please. Provide acidic (most GA soil already is), well-drained, moist soil, but not soggy. Use a slow release fertilizer.
- **Growth:** Grows quickly 18-24" tall or more and 16-18" wide
- **Hardiness:** Zone 5a-9a; Perennial; reseeding biennial/ perennial; Make sure that heavy mulch is removed around the plants to allow seeds to drop and sprout.
- **Foliage:** Soft, fuzzy leaves.
- **Flower:** This perennial beauty bears tall spikes of outward-facing, tubular flowers in a rich shade of pink that really catches the eye. Pollinators, such as butterflies, bees and even hummingbirds, love the shape of foxglove flowers and will visit the garden frequently. Blooms for months and is reliably tolerant to unexpected frost. Deadhead for repeated blooms.
