

Sombrero Sangrita Coneflower

**Easy to grow
wildflower
that blooms from
spring until frost!**

Echinacea 'Sombrero Flamenco' Sangrita'

- **Use:** Vibrant scarlet-red blooms on upright burgundy-red stems top this sturdy, compact plant. A fuss-free, cheerful choice for a sunny, easy-care low summer border. Drought tolerant and hardy, with prolific flowering over an exceptionally long season. Good choice for meadow or prairie gardens. Deer resistant.
- **Exposure/Soil:** Full– part sun. Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry.
- **Growth:** Quickly reaches 18 to 20 in. tall, 22 to 24 in. wide.
- **Hardiness:** Zone 4-9; Perennial
- **Foliage:** Deciduous. Dark green oval leaves are rough to the touch.
- **Flower:** This compact and robust plant is positively overloaded with flame red blooms from late spring all throughout the summer. The showy, sun-loving blossoms are magnets for butterflies and seem to hold the warmth of the sun in each vivid, pointed red petal.
