

SunSeekers® Tequila Sunrise Coneflower

The new SunSeekers Tequila Sunrise® Coneflower adds brilliant bi-color blooms to your garden & brings the pollinators to the party!

Echinacea 'IFECSTTS' PPAF

- **Use:** Perfect for the mid to back border, this coneflower features a strong, upright habit with masses of single flowers. Butterflies flit and flutter from one nectar-rich blossom to the next as they sip nectar from one of their favorites. Butterflies love the flowers, birds love the seeds, and we love the long-lasting bouquets. Excellent flower for the perennial border, natural meadow, butterfly or pollinator garden, or wildflower garden.
- **Exposure/Soil:** Full– part sun (afternoon shade). Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Water regularly, when top 3 in. of soil is dry. It grows easily and quickly, all you have to do is deadhead to keep the buds forming.
- **Growth:** Quickly reaches 18-24 in. tall, 18-20 in. wide.
- **Hardiness:** Zone 3a-9b; Perennial
- **Foliage:** Deciduous. Dark green oval leaves are rough to the touch which keeps the deer away.
- **Flower:** Golden yellow flowers with a flush of orange/red around pronounced cones create dramatic contrast. Cherished by butterflies, bees, and songbirds. A great plant for gardeners who love fresh bouquets. Sometimes very hungry deer may nibble flowers in summer drought so be ready to protect the blooms if you have lots of deer.
