

Orange Fragrant Wallflower

Loves the cool weather months and comes back every year!

Erysimum 'Glow Orange'

- **Use:** Wallflowers gladden the heart in spring with their heady fragrance and rich colours - a reminder summer is not far away. A cool season thriver, they are something new to grow along side your pansies, but they come back every year. Very floriferous, well-branched plants display brightly colored scented blooms in Spring and Autumn landscapes and mixed containers. Beautiful fragrance reminiscent of old English gardens.
- **Exposure/Soil:** Prefers full sun-part shade. Moist, well-drained soil, but not soggy.
- **Growth:** Grows 10-12" tall and wide
- **Hardiness:** Zone 7-9; Perennial; Will reseed.
- **Foliage:** Evergreen; Small long green leaves.
- **Flower:** Clusters of clove-scented, orange flowers appear from March to May above the lance-shaped, dark green leaves. Fragrant blooms two times a year in Spring and Fall.
