

Purple Glow Geranium

Attracts butterflies and it is very disease and deer resistant.

Geranium sanguineum "Balgerpur103" USPPAF

- **Use:** Purple Glow has excellent flower coverage with vibrant, saturated color. It has a vigorous, low-mounding habit and fills out containers nicely. Hardy geraniums are wonderful filler plants for any landscape, either residential or commercial. They blend nicely with most other perennials and offer continuous color throughout the summer months. It is an amazingly free-flowering cultivar as its flowers are sterile; it keeps the blooms coming from late spring into mid-fall.
- **Exposure/Soil:** Being drought tolerant, needs a full sun area with some shade in the afternoon. For best results, plant in a dry to moist area in a well-drained site.
- **Growth:** Grows 10-12" tall and 12-14" wide.
- **Hardiness:** Zone 3-8; Perennial
- **Foliage:** Deciduous; Dark green, deeply cut foliage.
- **Flower:** Bright purple flowers continue through the heat of mid-summer to fall frost.
