

Blonde Ambition Blue Gramma Grass

- A unique-looking native cultivar with season-long interest
- Appealing seed heads that persist well into fall
- Very cold hardy, and recovers quickly from snow cover
- Height and texture complement mixed perennial beds
- Tough, adaptable plant for full sun and dry conditions
- Tolerates poor soil and drought
- Fast growing
- Deer and critter resistant

***Bouteloua gracilis* 'Blonde Ambition' PP22048**

- **Use:** The humble, natural beauty of native Blue Gramma Grass is raised to a higher level of loveliness in Blonde Ambition. Its allure includes an abundance of horizontal seed heads, which resemble elegant, petite flags. They emerge chartreuse, and like many superstars, transform to blonde. These exquisite blooms hover above thin, blue-green, two-foot stems. Beloved for its resistance to pests, exceptional performance in low water conditions, retail appeal, and long-lasting attractiveness in gardens and containers.
- **Exposure/Soil:** Prefers full sun and well drained soil with minimal water applications.
- **Growth:** Grows to 1' (2.5'-3' in flower) tall and 1.5-2' wide.
- **Hardiness:** Zones 4-9, Perennial
- **Foliage:** Deciduous; Slender, pale blue-green foliage.
- **Flower:** Produces a showy mane of 2" long chartreuse blooms, held at a jaunty angle on stiff stems. In constant motion in even the slightest breeze, these cheerful pennants mature to persistent pale blonde seed heads. Attractive to birds.
