

Ice Dance Sedge

Very easy to grow and great for shady, moist areas where other plants will not grow!

Carex morrowii 'Ice Dance'

- **Use:** Cool-season grasses put on most of their growth in spring before temperatures begin exceeding 75 degrees Fahrenheit and in the fall when temperatures cool down. They generally maintain good color through the summer but won't grow much when it is hot. Cut back cool season grasses in very early spring.
- **Exposure/Soil:** Prefers moist, shady location. Needs ample water in hot dry locations.
- **Growth:** Grows to 10-16" tall and 18-24" wide.
- **Hardiness:** Zone 5-9; Perennial.
- **Foliage:** Evergreen. Leaves are variegated with creamy-white margins and a deep green center
- **Flower:** Brownish flowers in late spring are insignificant.
