

Red Rooster Hair Sedge

**Super easy
plant grows in
any location sun or shade
dry or wet soils! Excellent in
fall containers on the patio!**

***Carex comans* 'Red Rooster'**

Use: Slender, iridescent leaves offer an elegant sweeping, trailing habit. Cool season grasses tend to look good even as the weather cools.

- **Exposure/Soil:** Sun or shade; moist to wet soil; needs ample water in hot dry locations.
- **Growth:** Grows 12" wide and 12" tall.
- **Hardiness:** 7-10, perennial
- **Foliage:** Evergreen, though it benefits from a late winter cut back. Leave about 1/3 of the plant in place. Trimming cool season grasses too harshly can irreparably harm the plant.
- **Flower:** Early spring flowers are slender and form interesting seed heads
