

Amazon Mist Sedge

Very easy to grow and great for sun or shady, moist areas where other plants will not

grow!

***Carex comans* 'Amazon Mist'**

- **Use:** Mint colored foliage with a graceful growing habit makes Amazon Mist™ quite an interesting addition to your border or even in containers! Narrow leaves flow over the ground or spill over the edges of a pot, creating an exotic look. Requires moist soil until established at which point it can tolerate periods of drought. Amazon Mist™ makes a great addition to containers or the landscape. Add drama to shady spots or containers with this versatile, easy care grass. Use as a groundcover, to edge a path, or tuck into a window box. Great among hostas and ferns, but it's also fantastic in mixed color bowl container plantings.
- **Exposure/Soil:** A morning sun location helps hold the brightest color, which fades to chartreuse in more shade. Prefers moist, shady location. Needs ample water in hot dry locations.
- **Growth:** Grows to 12" -18" tall and 18-24" wide.
- **Hardiness:** Zone 7-9; Perennial.
- **Foliage:** Evergreen. They are blue-green on top, white on the underside, with tips that curl back on themselves and twist to reveal the white side, making the perimeter of the clump look misty.
- **Flower:** The tiny flowers appear in clusters atop thin stems in mid-summer.
