

Zebra Grass

**Drought tolerant and
needs little water.**

Miscanthus sinensis 'Strictus'

- **Use:** A versatile, easily grown clump-forming grass that grows well in any well-drained soil, from sandy to heavy clay.
- **Exposure/Soil:** Prefers full sun to part sun. Water regularly, when top 3 in. of soil is dry to start. Little water needed once established.
- **Growth:** Fast grower to 8 feet in height.
- **Hardiness:** 4-9 Perennial Grass
- **Foliage:** Deciduous. The foliage is noted for its horizontal, zebra-like yellow banding. Foliage should be left standing throughout the winter for visual interest and to provide protection for the crowns. Cut foliage to the ground in early spring, just before new shoots appear.
- **Flower:** Silvery flower plumes grow another two feet above the foliage and persist into winter.
