

Ice N Roses Barolo Lenten Rose

**A must
have
for
every
shade
gar-
dener!**

Helleborus x 'Ice n Roses Rose'

- **Use:** Ice N' Roses® Barolo also thrives in sunny places in the garden and is very robust. Combined with ornamental foliage plants in matching colours, such as alum root (Heuchera hybrids), bugleweed (Ajuga reptans) or ornamental grasses in concrete or pottery containers, Ice N' Roses® Barolo brings colour to balconies, terraces and entrances alike.
- **Exposure/Soil:** Part sun-shade. Prefers acidic, (most of our GA soils are acidic) moist, well-drained soil, but not soggy.
- **Growth:** Grows 8-12" tall and 18" tall - 24" wide; multiplies well.
- **Hardiness:** Zone 5-9; perennial
- **Foliage:** Evergreen, virtually problem free. Foliage is a handsome silvery-green.
- **Flower:** The garnet red colour of the extra-large flowers of Ice N' Roses® Barolo is reminiscent of the exquisite wine from Piedmont. The hardy Snow Rose is as excellent as the wine, with flowers from January through April.
