Helleborus NORTH STAR™  
'Plum'

**A must  
have for  
every  
shade  
gardener!**

## ***Helleborus x 'North Star'™ Series PPAF***

- **Use:** One of the easiest perennials to grow, Hellebores are indifferent to environmental stresses from heat and humidity to poor soil and even drought. Long-lived, they slowly spread into glorious colonies. And their ability to transform the late winter garden is unrivaled. Add them to your shade border and woodland garden this season, and begin enjoying the difference that year-round performance can bring!
- **Exposure/Soil:** Part sun-shade. Prefers acidic, (most of our GA soils are acidic) moist, well-drained soil, but not soggy.
- **Growth:** Grows 13-17" tall and 17" wide. (North Star Pink and Plum are larger at 25-30" tall and 38" wide.)
- **Hardiness:** Zone 4-9; Perennial
- **Foliage:** Evergreen, virtually problem free. Foliage is a handsome silvery-green. Produced in tissue culture and thick foliage is more resistant to black death disease.
- **Flower:** Double petaled flowers face upwards blooming in winter.
