

Ice Breaker® Bonny Snow Rose

Ice Breaker® Bonny of Winter Rose legend, Josef Hueger's Helleborus Gold Collection. It includes crosses of Helleborus x ericsmithii, H. x ballardiae, H. x nigercors and H. x lemonierae. After years of intensive breeding only the best of the best are selected. The plants are vigorous, flowers are upward facing.

Helleborus x nigercors 'Ice Breaker® HGC Bonny'

- **Use:** The Ice Breaker® Bonny is winter hardy, producing a myriad of creamy green flowers without fail from December to March. Bonny has a vigorous habit, which makes it the perfect garden plant. In the garden, the low-maintenance Snow Rose loves a partially shaded to sunny location and plant companions that don't spread excessively. In the container, Ice Breaker® combines well with white and green Coral Bells varieties (*Heuchera* hybrids), curry plant (*Helichrysum italicum*) or Lamb's Ear (*Stachys byzantina*). Planted solitary in a wicker basket, this ever-green Snow Rose also looks stunning on the windowsill. Deer resistant.
- **Exposure/Soil:** Part sun-shade (Morning sun and afternoon shade for best blooming). Prefers acidic, (most of our GA soils are acidic) moist, well-drained soil, but not soggy.
- **Growth:** Grows 14-18" tall and 16" wide
- **Hardiness:** Zone 4-9; Perennial
- **Foliage:** Evergreen, virtually problem free. Foliage is a handsome silvery-green. Remove any scruffy leaves in winter before flowering begins, and cut back flowering stems after flowering is over. More resistant to Helleborus Black Death (a virus spread by aphids)
- **Flower:** Upright stems bearing outward-facing, saucer-shaped, pale pink flowers with a darker pink picotee from mid-winter to mid-spring. This series is characterized by unique flowers with intense color. Big, beautiful, rich flowers on strong plants.
