

# Born To Run Daylily

## *Hemerocallis 'Born To Run'*

- **Use:** A showy daylily that will stop you in your tracks as it blooms in midsummer! Rich, rosy red flowers have a creamy yellow, incredibly ruffled picotee edge. A narrow pale pink watermark appears above the lime green throat. Although registered at 28", we have observed this daylily to be shorter at 20-22".
- **Exposure/Soil:** Full- part sun (but must be 5-6 hours of afternoon sun) . Moist, well-drained soil, but not soggy. Use slow release fertilizer two times a year. Once established needs only occasional water.
- **Growth:** Fast-growing and when in bloom, this mid-size clumper reaches 28 inches tall and 18-24" wide.
- **Hardiness:** Zone 3-9; Perennial
- **Foliage:** Semi-evergreen. The mounding strap like foliage adds a textural element to the garden when not in bloom.
- **Flower:** Midseason Bloomers, blooming in July.Rebloomer, producing a second set of flowers. Evergreen foliage. Tetraploid with 44 chromosomes, twice as many as Diploids. Tetraploids tend to be bigger, stronger plants.

**Daylilies can survive many harsh conditions that other plants cannot including: polluted city environments, slopes, poor and dry soils, near pavement that is salted in winter, and under Black Walnut trees (not affected by juglone).**
